# Connect IoT-Konnect

IoT-Konnect employs industrial internet of things (IIoT) technology to seamlessly connect smart meters with your MDMC(\*) software.

(\*) Meter Data Management Center

Our fully programmable M2M(Machine to Machine) terminal installed in the field communicates the smart meters with your MDMC software. The measurements are transmitted through diverse communications options using encrypted and secure channels to your MDMC software.

# Content IoT-Konnect

## Features

- Seamless integration between your remote smart meters and the client's software.
- Supports standard industrial protocols: DLMS/COSEM, DNP 3.0, Modbus, IEC 104
- Easy installation, without the need for a specialized crew.
- Weather resistance. Highly reliable service with more than 99.5% satellite communication channel availability (IsatData Pro network - Inmarsat).
- Discreet, low-profile equipment, which is less prone to vandalism.
- Geolocation.
- 24x7 customer service.

## **Benefits**

- Improve the overall performance or your operation by the integration of previously unconnected devices.
- Optimize operative costs and resources.
- Backup channel that guarantees availability close to 100% to comply with regulations that apply to energy measurement centers.
